ALTRO WHITEROCK™ HYGIENIC WALL SYSTEM

altro hygienic wall system

Altro's high-performance hygienic floor and wall systems are designed to provide safety and hygienic performance to meet the growing demands of today's stringent hygienic standards.

Whiterock is a durable, water-tight, seamless, smooth wall system designed specifically for building environments that are required to meet strict hygienic standards.

resists bacteria

Bacteria multiply quickly in environments that provide moisture. Unlike ceramic tiles or other wall finishes, Altro Whiterock has no gaps, cracks or grout for bacteria or mold to

grow in. This eliminates some of the common conditions that contribute to the spread of bacteria and microorganisms.

high-risk areas

- Showers
- Bathrooms
- Hospitals
- Food Preparation Areas

showers and bathrooms

The greatest risk of infection in bathrooms and showers is from the surfaces that we come in contact with — fixtures, door handles, walls, and floors.

hospitals

About 1.7 million Americans each year develop infections from various germs while hospitalized and almost 100,000 of them die, according to the U.S. Centers for Disease Control and Prevention. Across the globe, hospitals are taking steps to control the spread of infection by considering every possible means of providing hygienic solutions.

food preparation and kitchens

Each year, 76 million people in the U.S. get sick from contaminated food. Many different types of bacteria and viruses can contaminate food between production and preparation.

Whiterock provides a continuously smooth, stain-resistant, wipe-clean surface with no gaps or grout. It is easy to clean and extremely impact-resistant compared to ceramic tile.

close the gaps with altro whiterock

Gaps, chips and cracks allow dirt and moisture in on tiled surfaces, aiding in the growth of bacteria and microorganisms, and allowing water to seep to the substrate.

extremely durable

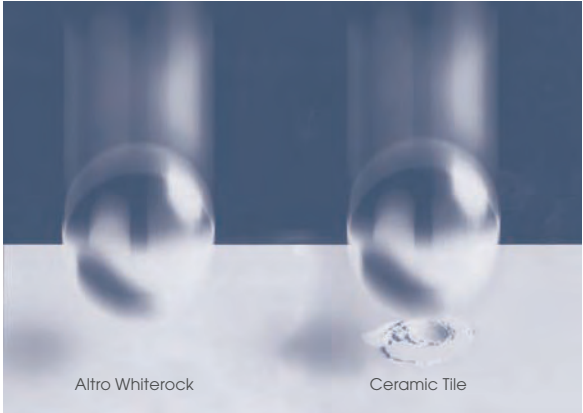

Altro WhiteRock is made to withstand wear and tear in heavy industrial areas. It will not dent or crack like ceramic tiles do on impact.

lower lifetime costs than tile

Altro WhiteRock is a smooth, continuous surface that is stain resistant and easy to clean. With WhiteRock, you won't find any of the maintenance problems that costly grouted systems produce like staining or individual tile failure. WhiteRock is also extremely durable, meaning less replacement of broken tiles.

impact resistance test

A ceramic tile chips on impact when a steel ball is dropped from one foot above the flat surface. Impact marks only become visible on Altro WhiteRock when the ball is dropped from 12 feet.

Steel ball dropped from one foot

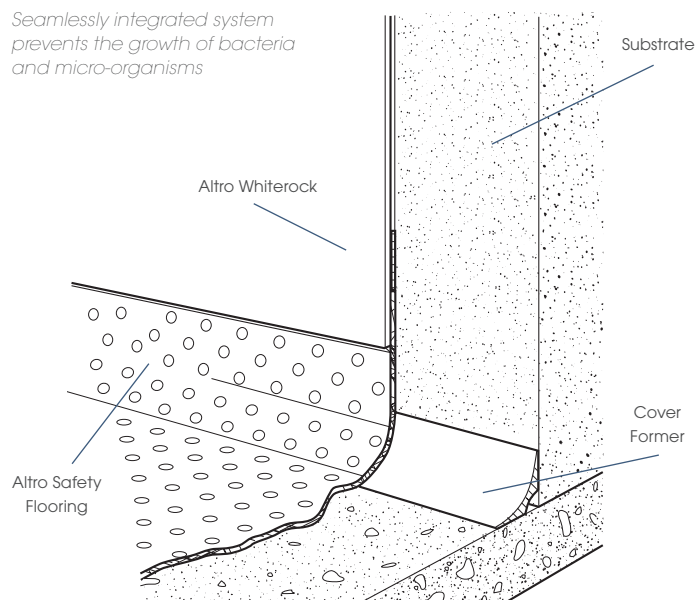

Color Range

For complete hygienic performance, use Altro Whiterock with Altro Safety Flooring for a seamless system with no gaps or cracks for dirt and bacteria to grow in.

a complete hygienic system

The Altro Whiterock Wall System is designed to integrate with Altro Safety Flooring in a seamless, water-tight joint. With welded seams, Whiterock has a sleek, seamless finish. Not only does it look great, but there are virtually no areas where bacteria and moisture can build up.

easy to install/ complete solution

Installation of Whiterock is a quick and easy process. Whiterock can be installed over existing wall surfaces, and often minimal preparation is required.

Altro offers a complete solution for showers and barefoot wet areas where safety and hygiene are essential.

The system provides:

- A seamless cove, no gaps or cracks
- Safety under foot
- An impervious surface
- Altrosan™ integrated bacteriostat
- Excellent stain resistance and cleanability

applications

Altro Whiterock Wall Systems and Altro Safety Flooring are ideal for environments where hygiene, durability, safety and ease of cleaning are critical to the success of the facility.

Some applications include: **kitchens / showers / operating rooms / scrub rooms / laboratories / food production areas / veterinary clinics / pharmaceutical production / manufacturing plants / clean rooms**

sustainability: a world without compromise

As a market leader and progressive company, we recognize that it is our responsibility to create and live by sustainable business practices. We have made significant strides in implementing our environmental strategies, but realize it is an ongoing and long road ahead. As part of our rigorous focus on improving sustainable business practices, we have undertaken a six-step approach towards continuously improving our social, economic, and environmental performance.

whiterock material content

The nature and primary use of Whiterock as a hygienic wall finish, means it has to comply with stringent standards for hygienic, non-toxic, and non-combustible performance.

In order to achieve these standards we can only use pure materials.
